Course Name	Course Description
Academic Success	This one-Semester elective provides practical, hands-on guidance on developing and improving study habits and skills, regardless of a student's level of accomplishment.
Accounting I A/B	This two-Semester course empowers high school students with the essential skills they need to understand accounting basics.
ACT Language Arts	The ACT assesses high school students' general educational development and their ability to complete;college-level work. Our course prepares students to take the test by learning the content ideas they will be tested on.
ACT Math	The ACT assesses high school students' general educational development and their ability to complete;college-level work. Our course prepares students to take the test by learning the content ideas they will be tested on.
ACT Reading	The ACT assesses high school students' general educational development and their ability to complete;college-level work. Our course prepares students to take the test by learning the content ideas they will be tested on.
ACT Science Reasoning	The ACT assesses high school students' general educational development and their ability to complete;college-level work. Our course prepares students to take the test by learning the content ideas they will be tested on.
Algebra I A/B	This two-Semester course is designed to cultivate and periodically assess your subject-matter knowledge while strengthening your mathematical skills.
Algebra II A/B	This two-Semester course is designed to cultivate and periodically assess your subject-matter knowledge while strengthening your mathematical skills.
American Literature A/B	This course explores the relation between American History and Literature.
American Sign Language 1 A/B	American Sign Language 1will introduce you to vocabulary and simple sentences, so that you can start communicating right away. Importantly, you will explore Deaf culture – social beliefs, traditions, history, values and communities influenced by deafness.
American Sign Language 2 A/B	American Sign Language 2 Builds upon the prior prerequisite course, emphasis in this course is placed upon comprehension and signing. Learners will also continue to establish their communication skills and foster their understanding of deaf culture. In addition to learning classifiers, glossing, and mouth morphemes, students will explore vocabulary for descriptions, directions, shopping, making purchases, and dealing with emergencies. Students will learn how to tell a story and ask questions, benefiting with greater exposure to deaf culture. Speed, conversations, signing skills, and cultural awareness are characteristic of this course.
American Sign Language 3 A/B	American Sign Language 3 you'll learn, compose, and present your new-found vocabulary and narrtives by immersing yourself in Deaf culture and community. From opinions, slang, and idioms, to using technology and media that offers authentic Deaf perspectives. Explore how travel, cultural differences, and geography affect sign language. And gain a better understanding of Deaf culture by learning important events and examining topics such as education, science, and literature.

Anatomy	In this one-Semester course students will explore the anatomy or structure of the human body.
Anthropology I A/B	In Anthropology 1 you will trace the history of homo sapiens and explore our evolutionary trail.
Anthropology II A	Anthropology II provides a fascinating look at how different locations shape various cultures and, in turn, how these cultures shape people’s lives around the world.
AP Calculus AB A/B	Calculus is the mathematics of change. It is used to solve complex problems that are continuously evolving and would otherwise be unsolvable with only algebra and geometry.
AP Computer Science A	This one-Semester course is intended to introduce you to the concepts of computer programming.
AP English Literature & Composition A/B	This two-Semester;online course is designed to teach learners to become skilled readers and writers through the study, analysis, and evaluation of literature.
AP United States History A/B	This two-semester course is designed to provide learners with the opportunity to think critically and to gain factual knowledge about US history.
Applied Medical Terminology A/B	Applied Medical Terminology A is intended to help you familiarize yourself with the medical terminology related to the human body systems. Applied Medical Terminology B is intended to help you understand the skills required to achieve success in healthcare careers.
Archaeology: Detectives of the Past	This course explores the various techniques, methods, and theories of this field and illustrates how archaeologists conduct their studies.
Art 1 A/B	The visual art suite will provide students the foundational skills to be successful in a studio environment.
Art 2 A/B	The visual art suite will provide students the foundational skills to be successful in a studio environment.
Art 3 A/B	The visual art suite will provide students the foundational skills to be successful in a studio environment.
Art 4 A/B	The visual art suite will provide students the foundational skills to be successful in a studio environment.
Art 5 A/B	The visual art suite will provide students the foundational skills to be successful in a studio environment.
Art History & Appreciation	This one-Semester course explores the main concepts of art, expression, and creativity as it helps students answer questions such as what is art; what is creativity; and how and why people respond to art.
Art in World Cultures	This course explores basic principles and elements of art and teaches you how to critique different art works art
Art K A/B	The visual art suite will provide students the foundational skills to be successful in a studio environment.

Artificial Intelligence	This one-Semester course is focused on the history, applications, and innovations of artificial intelligence.
Astronomy A/B	This course will include topics such as astronomy's history and development, basic scientific laws of motion and gravity, the concepts of modern astronomy, and the methods used by astronomers to learn more about the universe.
Audio/Video Production 1 A/B	This two-Semester course is designed to enable all students at the high school level to learn the basics of audio video production.
Audio/Video Production 2 A/B	This two-Semester course is designed to enable students at high school level to develop the knowledge and skills related to audio/video techniques that they can use in their careers.
Audio/Video Production 3 A/B	This two-Semester course is designed to enable all students at the high school level to students understand the basic concepts in audio video manufacturing.
Biology A/B	This two-Semester course is designed to strengthen your knowledge of basic biology.
Business English A/B	This two-Semester course is designed to strengthen your ability to read and write in the workplace.
Business Information Management 1a Introduction	This one-semester course is designed to gain the essential knowledge of business types, requirements to start a business, understanding of finances, business law, marketing, sales, customer service, and more.
Business Information Management 1b Data Essentials	This one-semester course is designed to help you learn about professional conduct, teamwork, and managerial skills, while also examining careers in business technology.
Career Explorations	This one-semester course is intended as a practical, hands-on guide to career exploration and planning.
Careers in Criminal Justice A/B	This two-Semester course is designed to explore some of the various occupations in the Criminal Justice.
Child Development A/B	This two-Semester course is designed to familiarize yourself with various aspects of child development and parenting.
Civics A/B	This course includes a variety of activities that examine the history, geography, culture, and economy of the state that encourage research and reflection.
Computer Programming I A/B	Computer Programming I combines engaging online and offline activities in a rigorous two-Semester course for high school students who may be aspiring to technical careers.
Computing for College & Careers A/B	This two-semester course is a practical, hands-on guide to help you understand the basic computer skills required during your college education and when pursuing a career.
Consumer Mathematics	In this one-Semester course, you will learn practical applications of math.

Contemporary World A/B	This two-semester course is designed to strengthen your knowledge about the modern world.
Cosmetology 1 A/B	This two-semester course is designed to teach you about various beauty regimes related to hair, nails, skin, and spa treatments, and discover how to create your own business model quickly and efficiently while still looking fabulous, of course!
Creative Writing: Unleashing the Core of Your Imagination	This course provides students with a solid grounding in the writing process, from finding inspiration to building a basic story to using complicated literary techniques and creating strange hybrid forms of poetic prose and prose poetry.
Criminology: Inside the Criminal Mind	In this course, we will explore the field of criminology or the study of crime. In doing so, we will look at possible explanations for crime from psychological, biological, and sociological standpoints, explore the various types of crime and their consequences for society, and investigate how crime and criminals are handled by the criminal justice system.
Culinary Arts 1a	Discover the history of food culture, food service, and global cuisines while learning about food science principles and preservation.
Culinary Arts 1b	Examine sustainable food practices and the benefits of nutrition while maintaining taste, plating, and presentation to truly wow your guests.
Culinary Arts 2	In this course, you will explore baking and desserts, learn how to prepare proteins, and study nutrition and safety in the kitchen.
Digital Media Fundamentals 1a Introduction	Learn about the elements that make impressive media, such as typography, color theory, design, and manipulation. Explore careers to apply your digital media skills and find your place in this fast-paced and exciting field!
Digital Media Fundamentals 1b Producing for the Web	Incorporate your creative ideas into websites and discover the basics of marketing to understand how your work can be used effectively.
Digital Photography I A/B	Gain a better understanding of photography by exploring camera functions and the elements of composition while putting theory into practice by taking your own spectacular shots!
Digital Photography II A	Examine various aspects of the field including specialty areas, ethics, and famous photographers throughout history.
Drafting and Design A/B	From the history of drafting and design to a look at the latest in the industry's latest computer-aided tools, this two-Semester course gives your students a comprehensive look at a dynamic and in-demand career.
Early Childhood Education 1a	Explore the fundamentals of childcare, like nutrition and safety, but also the complex relationships caregivers have with parents and their children.
Early Childhood Education 1b	Learn the importance of play and use it to build engaging educational activities that build literacy and math skills through each stage of childhood and special need.

Earth & Space Science A/B	This two-semester course is designed to teach you they study of the natural world.
Economics	This one-Semester course covers basic economic problems such as scarcity, choice, and effective use of resources.
Electronic Communication Skills	This one-Semester course is based on Career and Technical Education (CTE) standards to help students prepare for entry into a wide range of careers and/or into post-secondary education.
English 6	English is the study of the creation and analysis of literature written in the English language.
English 7	English is the study of the creation and analysis of literature written in the English language.
English 8	English is the study of the creation and analysis of literature written in the English language.
English I (English Fundamentals) A/B	English I introduces the elements of writing poems, short stories, plays, and essays.
English II (World Literature ) A/B	This course focuses on using personal experiences, opinions, and interests as a foundation for developing effective writing skills.
English III (American Literature) A/B	This course explores the relation between American History and Literature.
English IV (British Literature) A/B	This course emphasizes the study of literature in the context of specific historical periods
Entrepreneurship 1a Introduction	Explore topics such as identifying the best business structure, business functions and operations, finance, business laws, regulations, and more.
Entrepreneurship 1b Make Your Idea a Reality	Throughout this course, you'll explore different topics representing the major parts of a business plan, such as risk, hiring, pricing, marketing, and more.
Essential Career Skills	This one-Semester course helps students understand and practice critical life and workplace readiness skills identified by employers, state boards of education, and Advance CTE.
Exercise Science	This one-Semester course takes an in-depth examination of the effects of exercise on the body.
Family & Consumer Science	Family & Consumer Science is a one-Semester course that prepares students with a variety of skills for independent or family living.
Family Living and Healthy Relationships	In this one-Semester course, students examine the family unit and characteristics of healthy and unhealthy relationships at different phases of life – including information on self-discovery, family, friendships, dating and abstinence, marriage, pregnancy, and parenthood.

Fashion Design	Learn what it takes to get started in the fashion industry, from the careers available to new technology and trends reshaping the industry every day.
Financial Mathematics A/B	Financial Mathematics is designed to instruct students in algebraic thinking while also preparing them to navigate a number of financial applications.
First Aid & Safety	In this one-Semester course, students learn and practice first aid procedures for a variety of common conditions, including muscular, skeletal, and soft tissue injuries.
Fitness Basic 1 (7th grade)	This one-Semester course provides students with a basic understanding of fitness and nutrition.
Fitness Basic 2 (8th grade)	This one-Semester course provides students with a basic understanding of fitness and nutrition.
Fitness Basics A/B	This two-Semester course provides students with a basic understanding of fitness and nutrition.
Fitness Fundamentals A/B	Fitness Fundamentals is designed to provide students with the basic skills and information needed to begin a personalized exercise program and maintain an active and healthy lifestyle.
Flexibility Training	This one-Semester course focuses on the often-neglected fitness component of flexibility.
Forensic Science I: Secrets of the Dead	This course focuses on some of the techniques and practices used by forensic scientists during a crime scene investigation (CSI).
Forensic Science II: More Secrets of the Dead	Examine some of the basic scientific principles and knowledge that guides forensic laboratory processes, such as those testing DNA, toxicology, and material analysis.
Foundations of Game Design 1a: Introduction	Pursue your passion by learning about the principles of game design through the stages of development, iterative process, critiques, and game development tools.
Foundations of Game Design 1b: Storytelling, Mechanics, and Production	Develop your game creation skills and practice with the tools professionals use to launch your career options in the field of game design.
Geometry A/B	Geometry is a branch of mathematics that uses logic and formal thinking to establish relationships among points, lines, angles, plane figures, and solids, and to define their properties.
Gothic Literature	Gothic Literature is a one-Semester course that analyze the conventions, elements, themes, and other characteristics of Gothic literature.
Gothic Literature: Monster Stories	This course will focus on the major themes found in Gothic literature and demonstrate how the core writing drivers produce, for the reader, a thrilling psychological environment.

Graphic Design and Illustration A/B	This course covers careers you can pursue in graphic design. It also covers training and skills required for a graphic designer.
Great Minds in Science: Ideas for a New Generation	This course focuses on 10 of today's greatest scientific minds.
Group Sports	This one-Semester course provides students with an overview of group sports.
Health	This one-semester;course will guide you through lifestyle choices you will make which will ultimately impact your life in meaningful ways.
Health Grade 6	Health
Health Science Foundations 1a	Acquire foundational knowledge required to pursue a career in the healthcare industry, and the education, training, and credentials needed to attain them.
Health Science Foundations 1b	Acquire foundational knowledge required to pursue a career in the healthcare industry, and the education, training, and credentials needed to attain them.
History of the Holocaust A/B	In this course, students will study the history of anti-Semitism; the rise of the Nazi party; and the Holocaust, from its beginnings through liberation and the aftermath of the tragedy.
Holocaust Studies	In this course, you will trace the history of Jews living in Europe and the origins of anti-Semitism.
Hospitality & Tourism 1: Traveling the Globe	You'll be introduced to a thriving industry that caters to the needs of travelers through managing hotels,restaurants, cruise ships, resorts, theme parks, and any other kind of hospitality you can imagine.
Hospitality & Tourism 2a: Hotel & Restaurant Management	You will learn about what makes the hotel and restaurant industries unique.
Hospitality & Tourism 2b: Management, Marketing, & Operations	Learn about different management styles and how to develop job descriptions and business plans.
Human Geography: Our Global Identity	Students will explore the diverse ways in which people affect the world around them and how they are affected by their surroundings.
Interior Design	This course will help you to identify parts of interior design that are most interesting to you, helping you to chart the path for your future.
International Business	This one-Semester course helps students develop the appreciation, knowledge, skills, and abilities needed to live and work in a global marketplace

Introduction to Android Mobile App Development	This one-Semester course is designed to introduce students to the process involved in creating a mobile app.
Introduction to Anthropology	This one-Semester elective course is intended as a practical guide to introduce you to the field of anthropology.
Introduction to Archaeology	This one-Semester course discusses the work and techniques involved in archaeology, and the prospects of an archaeologist.
Introduction to Astronomy	This one-Semester course is intended to introduce you to the concepts of astronomy.
Introduction to Criminology	This one-semester course is intended as a guide to the field and theories of criminology.
Introduction to Cybersecurity	This one-Semester course is intended to introduce you to the concepts of cybersecurity.
Introduction to Fashion Design	Introduction to Fashion Design is a one-semester course intended to introduce students to the basics of fashion design.
Introduction to Finance	This one-Semester course is designed to enable students at high school level to develop financial skills that they can use during in their careers in business organizations.
Introduction to Forensic Science	This one-Semester course is intended for you to familiarize yourself with the knowledge and skills required for a career in Forensic Science.
Introduction to iOS Mobile App Development	This one Semester course is designed to introduce students to the process involved in creating an app.
Introduction to Marine Biology	In the one-Semester course you will explore the fundamental concepts of marine biology.
Introduction to Military Careers	Introduction to Military Careers is a single Semester course that describes the different careers offered by the US military and its branches.
Introduction to Philosophy	This one-Semester course is intended as a practical guide to help you understand the subject matter of philosophy, its main branches, and the major ideas and issues discussed in each branch.
Introduction to Social Media	This single semester elective course is intended as a practical, hands-on guide to help you understand the world of social media and how individuals, social groups, and businesses are using different types of social media.
Introduction to Visual Arts	This one-Semester course is designed to enable all students at the high school level to familiarize themselves with different types of visual arts.
Introduction to World Religions	This one-Semester course is intended to help you understand the origin, beliefs, and practices related to various world religions.

Language Arts 1 A/B	The Elementary English Language Arts courses provide students with a rigorous and comprehensive look at the ELA standards, focusing on reading foundational skills, reading comprehension strategies through informative and literature texts, writing, grammar, and speaking and listening skills.
Language Arts 2 A/B	The Elementary English Language Arts courses provide students with a rigorous and comprehensive look at the ELA standards, focusing on reading foundational skills, reading comprehension strategies through informative and literature texts, writing, grammar, and speaking and listening skills.
Language Arts 3 A/B	The Elementary English Language Arts courses provide students with a rigorous and comprehensive look at the ELA standards, focusing on reading foundational skills, reading comprehension strategies through informative and literature texts, writing, grammar, and speaking and listening skills.
Language Arts 4 A/B	The Elementary English Language Arts courses provide students with a rigorous and comprehensive look at the ELA standards, focusing on reading foundational skills, reading comprehension strategies through informative and literature texts, writing, grammar, and speaking and listening skills.
Language Arts 5 A/B	The Elementary English Language Arts courses provide students with a rigorous and comprehensive look at the ELA standards, focusing on reading foundational skills, reading comprehension strategies through informative and literature texts, writing, grammar, and speaking and listening skills.
Language Arts K A/B	The Elementary English Language Arts courses provide students with a rigorous and comprehensive look at the ELA standards, focusing on reading foundational skills, reading comprehension strategies through informative and literature texts, writing, grammar, and speaking and listening skills.
Law & Order: Introduction to Legal Studies	Delve deeper into the importance of laws and consider how their application affects us as individuals and communities.
Life Management (7th grade)	Explore the connections between your physical, mental, and social health. Learn how to promote better health by decreasing stress and finding a fuller vision for your life through lifestyle choices, interactions with others, healthcare, and making sensible dietary choices.
Life Science A/B	Life Science deals with the study of all types of living organisms, such as microorganisms, plants, animals, and humans.
Life Skills (8th grade)	This one-Semester course allows students to explore their personality type and interests, as well as refine important skills that will benefit them throughout their lives.
Life Skills: Navigating Adulthood	This course will encourage you to learn more about yourself and help you to prepare for the future.
Lifetime & Leisure Sports	This one-Semester course provides students with an overview of dual and individual sports.

Manufacturing: Product Design & Innovation	In this course, you'll learn about the types of manufacturing systems and processes used to create the products we buy every day.
Marketing Advertising and Sales	This one-Semester course effectively helps your students prepare for a career in that environment through a comprehensive look at essential marketing principles, interactive tools and channels, and the growing impact of data in marketing and advertising.
Math grade 1	Elementary math courses inspire students to become critical thinkers and problem solvers.
Math grade 2	Elementary math courses inspire students to become critical thinkers and problem solvers.
Math grade 3	Elementary math courses inspire students to become critical thinkers and problem solvers.
Math grade 4	Elementary math courses inspire students to become critical thinkers and problem solvers.
Math grade 5	Elementary math courses inspire students to become critical thinkers and problem solvers.
Math grade 6	Mathematics is the study of the patterns around us. Using the tools in this course, you will learn more about how to solve problems using expressions and equations.
Math grade 7	Mathematics is the study of the patterns around us. Using the tools in this course, you will learn more about how to solve problems using expressions and equations.
Math grade 8	Mathematics is the study of the patterns around us. Using the tools in this course, you will learn more about how to solve problems using expressions and equations.
Math grade K	Elementary math courses inspire students to become critical thinkers and problem solvers.
MS 2D Studio Art	In 2D Studio Art, you'll learn how to bring your art visions to life
MS Career Exploration 1	This course allows you to begin exploring options in fields such as teaching, business, government, hospitality, health science and IT
MS Career Exploration 2	Compare the pros and cons of different career choices and try out parts of different careers to see if your skills and preferences align
MS Civics	Examine founding documents and landmark Supreme Court cases in American political history, analyze changes in federal and executive power over time, explore the political election process and data related to recent voting trends, research and propose a public policy plan, as well as compare and contrast the functions of the national government with state and local governments.
MS Earth and Space Science A/B	This two-semester course is designed to teach you they study of the natural world.
MS Journalism	In this course, students will learn how to gather information, organize ideas, format stories for different forms of news media, and edit their stories for publication.

MS Photography 1b: Drawing with Light	Explore how to manipulate angles and lighting, the purpose for different types of photo files, how to use different software to edit photos, and safe places you can store them.
MS Photography 1a: Introduction	Learn the basics of using a camera, lighting, and how to choose great subjects to create magazine-worthy photos and amaze your friends and family with your skills.
MS Physical Science A/B	Physical science is the study of matter and energy.
MS US History	In Middle School US History you'll learn about major events that took place in American history.
MS World Geography	You will learn about these special features which drive economic development and form the locales where people settle.
