2023-24 Annual Report on the Missouri Course Access and Virtual School

Introduction

The Missouri Course Access and Virtual School Program (MOCAP) offers Missouri students a wide range of high-quality courses, flexibility in scheduling, and interactive online learning. MOCAP provides students and families the opportunity to:

- Engage in school choice,
- Personalize learning to student interests, and
- Provide equitable access to high-quality, rigorous courses no matter where a student resides.

In 2023-24 MOCAP continued to provide Missouri students and families both online course options through requests made to their local education agencies (LEAs) and through direct enrollment in full-time online programs hosted by public school districts, charter schools and public higher education institutions. In addition to offering courses taught by Missouri certified teachers, MOCAP providers also offered LEAs courses with curriculum-only options to support solutions to local issues related to certified teacher shortages, equity of access, or LEAs' desires to expand individualized or flexible learning pathways.

MOCAP courses may be delivered synchronously or asynchronously, depending upon course design. All courses are aligned to Missouri Learning Standards or other nationally recognized standards, including Advanced Placement, Project Lead the Way, and various workforce and career-specific certification programs.

MOCAP's role at the state department level is to guarantee standards alignment of course curriculum to Missouri Learning Standards, to verify teacher certification, to verify LEA compliance with parent and guardian notification of online learning options for Missouri students, to ensure providers meet statutory qualifications to become or remain part of the MOCAP provider group, and to answer questions related to online learning. This oversight role allows MOCAP providers and host LEAs the autonomy to provide courses and instruction that meet both the needs and the demands of Missouri's learners.

During the 2023-24 school year, the fifth year of MOCAP, the program served about 12,364 students, an increase of 5,204 students. Of the students served, 2,715 students remained enrolled in their resident districts and participated in one or more MOCAP courses. The remaining 9,649 students were enrolled by parents or guardians in full-time hosted MOCAP programs.

Analysis showed MOCAP course participation increased by 1,324 students in 2023-24, about a 51 percent increase in course participation over 2022-23 levels. Full-time hosted MOCAP student participation increased by 3,880 students, or by about 60 percent, over the previous year. There were 1,994 courses provided by 17 authorized providers in 2023-24, representing an increase of 20 courses and a decrease of one provider. In all, students were enrolled in 93,688 MOCAP courses in 2023-24, an increase of 34,878 course enrollments over the previous year. Course completion improved in 2023-24, increasing by 10 percent to 95 percent; the number of courses both completed and passed decreased by 12 percent, with the combined course completion and passing rate in 2023-24 ending at 74 percent.

This report fulfills the Missouri Department of Elementary and Secondary Education’s (DESE’s) reporting requirements under §161.670.10, RSMo. This Annual Report is a full disclosing of available data related to course enrollments, passing rates, and state testing metrics for students participating in the MOCAP program. This report also provides state testing data for MOCAP students who enrolled in courses and for students who were enrolled in full-time MOCAP programs under legislation enacted during the 2022 legislative session, when full-time hosted providers became attendance centers within their host LEAs. Further, data for full-time hosted providers is provided as outlined in the statute as required under § 161.670.3(4)(i), RSMo.

The reader should note that this report addresses only the MOCAP program for the 2023-24 school year. Schools in Missouri may also provide virtual learning to their students outside of MOCAP, either through locally developed courses, contracts with providers, or agreements with each other. Virtual coursework data for these courses are not included in this report.

Summary Statistics		
12,364 Total Students	1,994 Authorized Courses	17 Authorized Providers
93,688 Course Enrollments	95% Completion Rate	74% Combined Passing Rate

Table 1

Definitions

Combined Passing Rate: The number of students who completed and passed the course with a 60 percent or higher, divided by the number of students enrolled in the course.

Completion Rate: The number of students finishing a course, regardless of final grade, divided by the total number of students that enrolled in the course.

Learning Gains: Changes in academic achievement over a period of time, usually from one year to the next.

Passing Rate: The number of students who passed the course with a 60 percent or higher, divided by the number of students that completed the course.

Program and Provider Data

Enrollment and Completion Data

Year-end data verification reports from the courseware providers indicated just over 7,100 students were enrolled in over 58,000 courses during the 2023-24 school year. Eighty-five percent of students completed their courses with 86 percent both completing and passing the courses.

MOCAP Student Demographics

Legislation requires the reporting of student demographic information in the MOCAP annual report for full-time hosted MOCAP students. All MOCAP students were included in student enrollment of their respective resident LEA and LEAs reported student information to the Department of Elementary and Secondary Education as part of Core Data and MOSIS data reporting cycles, for which all Missouri public and charter schools are accountable.

The demographic data regarding free or reduced-price meals, English learning students, students receiving special education services under an Individual Education Plan (IEP), or a Section 504 Plan are used in the weighting calculation for state funding. The certified teacher information is provided to MOCAP by providers to verify that all MOCAP courses are taught by Missouri certified educators who are assigned to courses they are appropriately certified to teach. It is important to note that MOCAP students may enroll from various types of prior educational institutions. The three categories of enrollment represented in the chart below identify the most common prior educational entities from which MOCAP students enrolled.

The data in the proceeding charts is provided by MOCAP providers to the MOCAP state office and represents the providers' self-reported information.

Race, Ethnicity, Special Programs, and Enrollment Characteristics

	Hispanic	Asian	American Indian	Pacific Islander	Black	Multiracial	White	TOTAL

Host District Payments

In 2023-24, legislation provided for the distribution of state school aid to host LEAs for full-time MOCAP students. Full-time MOCAP students were included in student enrollment of the LEA and LEAs received an amount per student enrollment equal to the state adequacy target multiplied by the average daily attendance of the full-time MOCAP students.

MOCAP Host District	MOCAP Provider	2022-23 Total Payments	2023-24 Total Payments
Boonville	Greenways Academy	--	\$0
Grandview R-II	MOVA/Stride	\$12,794,625.00	\$11,833,661.96
Laquey R-V	MODA/Stride	\$1,542,750.00	\$1,368,862.31
Lee's Summit R-VII	R7 Academy/District	\$44,625.00	\$65,806.58
Mehlville R-IX	At-Home Academy/District	\$573,750.00	\$552,066.08
Springfield R-XII	Launch/District	\$2,550,000.00	\$3,032,351.63
St. Joseph	Virtual Academy/District	\$57,375.00	\$17,404.39
Sturgeon R-V	Connections Academy	\$7,003,355.06	\$6,813,974.85
University Of Mo - Columbia	Mizzou Academy/MU	\$6,375.00	\$13,894.31
Total-All Payments		\$24,572,855.06	\$23,698,022.11

Table 7

Equitable Access to Coursework

Parent survey results indicated that coursework options not available locally - especially Advanced Placement (AP), honors, and elective courses - were often cited reasons choosing MOCAP courses. World languages, technology courses, and career exploration electives are popular electives and expanded the course opportunities for students enrolling in MOCAP. With the exception of advanced core classes, core offerings tended to be redundant to those already available to students. On average, over half of the parents and guardians who responded to the MOCAP survey estimated that at least 10 percent of courses taken virtually were not available to students in their resident districts. MOCAP providers added courses in the area of Project Lead the Way (PLTW), career exploration and post-secondary readiness to their respective catalogues in 2023-24, affording engaging choices for students in these career and technical areas. The table below shows the number of courses by content area students were able to access through MOCAP.

Content Area	K-5*	6-8**	9-12***	Total Number of Courses
Agriculture	0	0	30	30
Business & Marketing	14	23	310	347
Career Education	0	27	411	438

Table 9

Student Outcome Data

A primary set of statistics used in this report is enrollment counts, completion rates, and passing rates. Enrollment counts indicate the degree to which courses are of interest to students and generate student selection and enrollments. Completion rates indicate the degree to which students persist to the end of the course, regardless of their final grade. Combined completion and passing rates indicate the degree of success students realize in a course, as measured by the course grade of 60 percent or higher, divided by the number of students who completed the course.

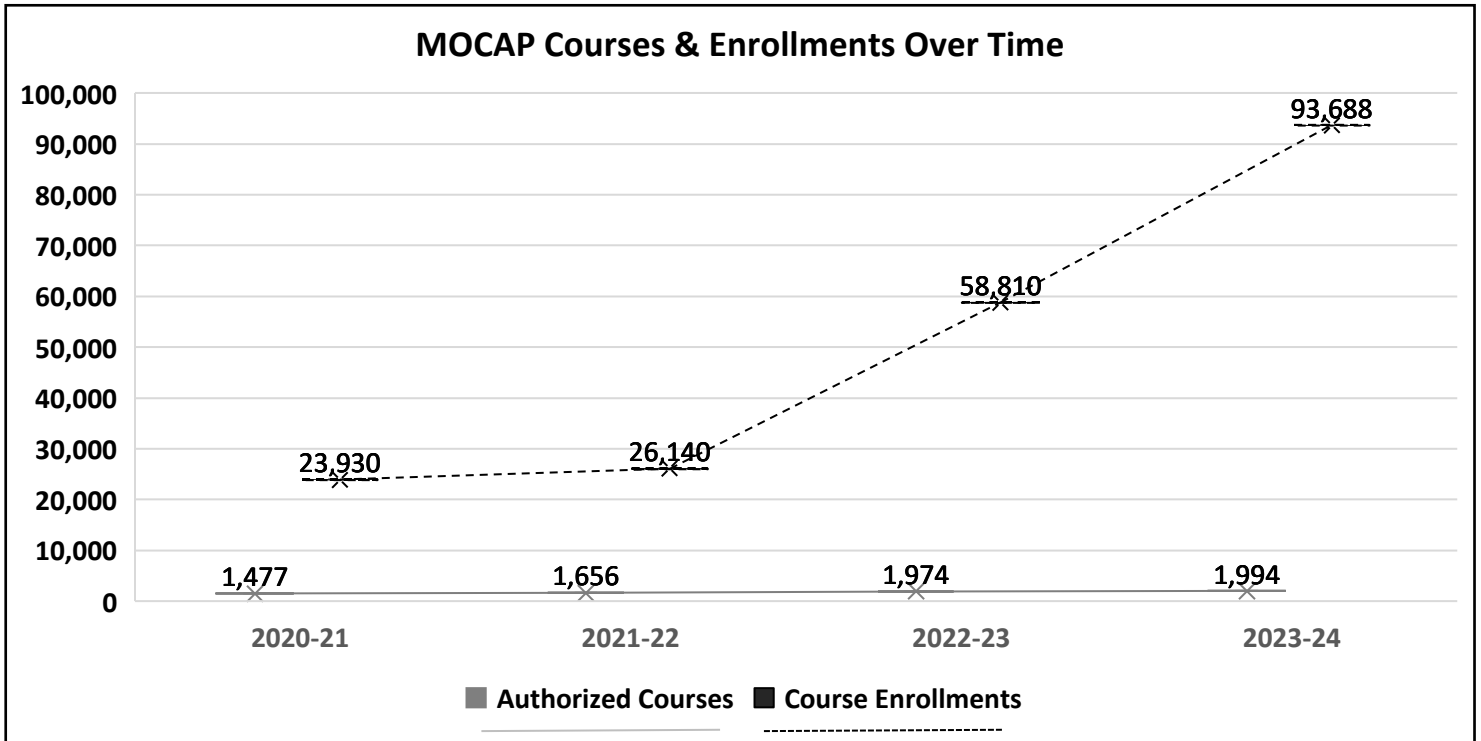

Also included in the data are state assessment results for MOCAP students. Statute requires, and good educational practice advises, that learning gains be used in the MOCAP program evaluation. Learning gains show a student's academic growth over a period of time, usually from one year to the next. After establishing baseline data for MOCAP students' state assessment results in the 2020-21 year, the 2023-24 data represents the fourth year of data representative of trend data of students' performance over time. The data also includes the second year of data for full-time, hosted MOCAP providers whose state assessment data is calculated, by order of statute, into an Annual Performance Report (APR) score calculation for the provider's attendance center within the host district and as part of the host district's APR scores.

Table 22

MOCAP Student Test Data

State assessment results demonstrated low proficiency. There was improvement over state assessment 2023 participation rates, which averaged 94%, 93%, 94% and 95% for ELA, mathematics, science, and social studies, respectively. Participation rates for 2024 state assessments were 99% in all tested areas, with an increase in the number of students participating in the assessments in each of the tested areas. The increases in student numbers were significant, making the corresponding increases in assessment participation rates evidence of provider efforts to ensure students provided data that contributed to both the site and district Annual Performance Report accountability scores.

While state assessment proficiency remained at low levels, of the 18 assessments, MOCAP hosted results posted improvement in six areas, showed no change in three areas, and dropped in performance levels in nine areas. MAP and EOC performance lagged, falling from previous proficiency rates and trailing state averages by wide margins. Full-time MOCAP providers provided realistic feedback that student performance on state assessments had contributing variables, including assessment different than the mode of instruction and assessment fatigue, since MOCAP full-time students had to travel to a physical testing site to test. Most students took more than one MAP test in a single day, when their in-person peers take a single MAP test over multiple days. This led students to a goal of completion rather than quality of effort, as endurance for multiple formal assessments in a single setting is challenging for students whether educated in person or online.

Missouri accountability is reported for students who are and who are not included in specific demographic groups. **Student groups** are defined in the Missouri School Improvement Program (MSIP) 6 Comprehensive Guide (2024) as being disaggregated by groups of students who are:

low-income students (defined as students who are reported as direct certified (DC) in the National School Lunch Program), students with disabilities (SWD), English learners (EL), and the state's major racial and ethnic student groups. A review of Missouri data identifies five groups who have performed historically below state average: Black, Hispanic, DC, SWD, and EL students. LEAs and schools will receive APR points based on the performance of the aggregated cohort of all students and will also receive a separate score for the cohort comprised of students in one or more of these historically underperforming student groups" (p. 15).

MSIP 6 Comprehensive Guide to the Missouri School Improvement Program. (2024). Missouri Department of Elementary and Secondary Education. Updated 15 April 2024.

MOCAP ACT® Data

In 2023-24, there were 1,049 students enrolled in MOCAP as seniors. Of the seniors enrolled, 314 participated in at least one ACT test, so the ACT® composite average represents data from 36% of the Class of 2024 MOCAP cohort having participated in the ACT® and having an ACT® score reported in the ACT® Score Report. This is below the Missouri 2024 cohort ACT® participation rate of 48% and nearly the same as the national average of 37%.

	Number of Students Tested	Average ACT® Composite	Number of Students in Cohort	Percent of Cohort Taking ACT®
Class of 2024 MOCAP	314	18.3	1,049	36%
Class of 2024 Missouri*	54,369	19.8	63,173	48%
Class of 2024 National*	n/a	19.2	n/a	37%

Table 33

	English Composite	Math Composite	Reading Composite	Science Composite	Composite Average
MOCAP Class of 2024	17.3	17.8	19.4	18.5	18.3
Missouri Class of 2024	18.8	19.5	21	20.2	19.8

Table 34

Summary of Parent/Guardian & LEA Surveys

In compliance with Section 161.670.3(4)(b), RSMo., the Department collected feedback from parents/guardians who had students enrolled in MOCAP courses. This feedback was gathered related to the reasons for students participated in MOCAP as required by statute. In addition, the surveys also gathered information related to parents’ and guardians’ perceptions of MOCAP course quality.

An LEA survey was distributed at the end of the 2024-25 academic year and received 241 unique responses.

The survey’s perceptual data helps determine reasons for enrollment in the MOCAP course or full-time programs and course quality using a five-point Likert scale ranging from “strongly disagree” to “strongly agree.” The figures below are averages of all responses.

Feedback from Parents/Guardians

Summary and Conclusions

During the 2023-24 academic year, MOCAP worked to maintain consistency with practices established in 2022-23 after the passage of HB 1552, which established two pathways for online learning in Missouri. The year also brought the MOCAP administrative rule out of abeyance and into practice, ending nearly one year without administrative procedure to support the new legislation.

MOCAP providers worked to improve student engagement in courses and participation in state assessments, with data indicating that the increased participation rate goal was met. Parent choice in their children's education continued to gain momentum, which seemed to contribute to the increase in MOCAP full-time enrollments.

As full-time MOCAP enrollment continued to trend up, MOCAP course enrollment declined for the second straight year, with one course provider choosing to discontinue participation as a MOCAP partner. Likewise, two full-time providers chose to discontinue their partnership.

State assessment performance continues to trail state averages, as students who engage in MOCAP are, in many cases, students who have risk indicators prior to enrolling in online learning. These students enroll, as reported by parents, due to dissatisfaction with their local schools or districts, due to medical or emotional conditions, or as a chance to realize success in school. Students who sought academic enrichment or acceleration tended to enroll in MOCAP courses through their LEA rather than full-time enrollment.

Both student and course enrollment metrics increased in 2023-24 and again exceeded the previous year's record. As new providers and host districts participate in MOCAP, it is likely this trend will continue. The MOCAP team works to provide supports for MOCAP providers and host districts, LEAs, parents, and students by transitioning to a new MOCAP website and reviewing processes to ensure we are serving Missouri and their opportunity for to review their online learning choices in the most efficient and effective ways possible.

Appendix A – Approved Courses by Provider

Enrollment figures in the courses on the following pages are calculated from monthly progress reports provided by the providers.

Note that enrollment data is provided by semester. If enrollment data is given as “8”, for example, that means that there were a total of 8 semester enrollments during the 2023-24 academic year.

Fields, if available, include:

- Course Name
- Grade Level (K-12)
- Type of Credit/Subject (ELA, Science, Electives, Etc.)
- MOSIS Course ID
- NCAA Approved (Yes or No)
- Prerequisites (Yes or No)
- Number of Semesters (1, 2, or full year (FY))
- Per Semester with Teachers Cost
- Per Semester Curriculum Only Cost
- Per Year with Teachers Cost
- Per Year Curriculum Only Cost
- Materials and Book Cost
- Enrollment Numbers
