

# Choosing Your MOCAP Pathway

Use the suggestions included here to make a decision that best fits your student and situation.

## MOCAP Course Enrollment may be the right choice when:

Your student needs one to six courses or a specialty course rather than a full online schedule

The student prefers to remain enrolled in their current school.

The student and family desires the local district to manage enrollment, grades, and services.

The student wants to take a course that is not offered locally.

The student and family understand district approval is required and not guaranteed.

The student continues to take state assessments in the local district.

## MOCAP Full-Time Hosted Enrollment may be the right choice when:

The student and family are comfortable with a transfer to another district.

The student and family want all coursework online and the student can manage a full virtual experience.

The student and family do not want to participate in a district approval process.

The family prefers direct enrollment with the MOCAP provider.

Provider websites are linked in the Customer Service section of each provider's page on the MOCAP website.

The student and family understand that state assessment and attendance/engagement are required for participation.
